

# IP Audio System

# Elevate your surveillance system

Meet Hanwha Vision's brand-new IP Audio System that will take your surveillance system to a higher level. Other than security, the IP audio system enables you to gain operational efficiency. Easy to install, use & manage, it is supported by the following features:

**All-In-One**  
Pure Standalone

Simple installation with built-in IP amplifier

**PoE & PoE+**  
Dual Support

Enables higher quality sound & higher volume

**TTS**  
Text to Speech

Supports multiple languages with female/male voices

**Monitoring**  
Status checking

Easy to check out sound and status from audios

**SIP**  
PBX integration

Allows PBX phones to announce with speakers

**Scheduler**  
Day, Week, Month and Year

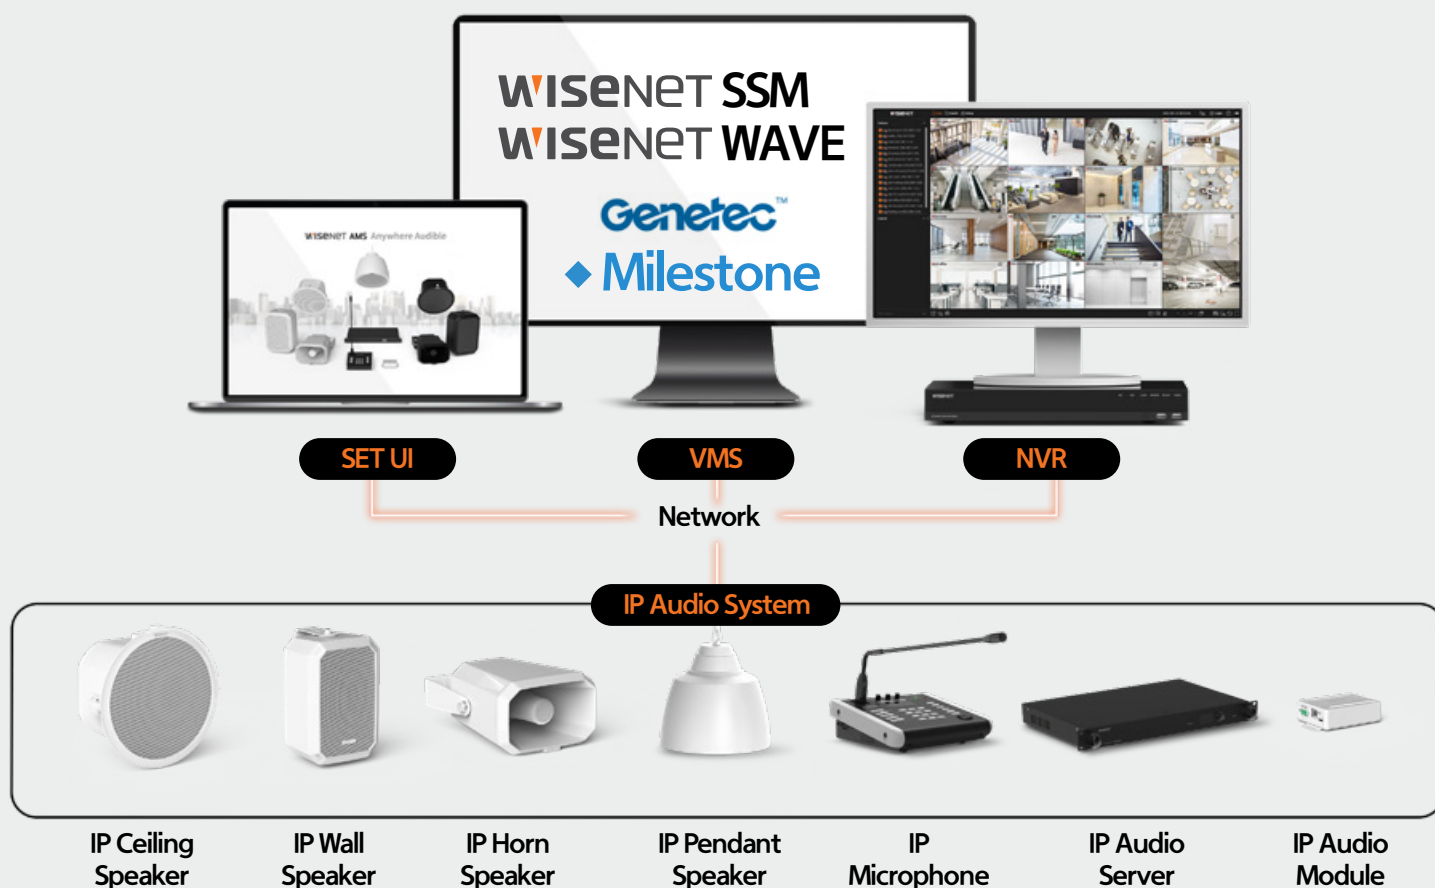

Helps set up audios with BGM & announcements

# Customised security strategy

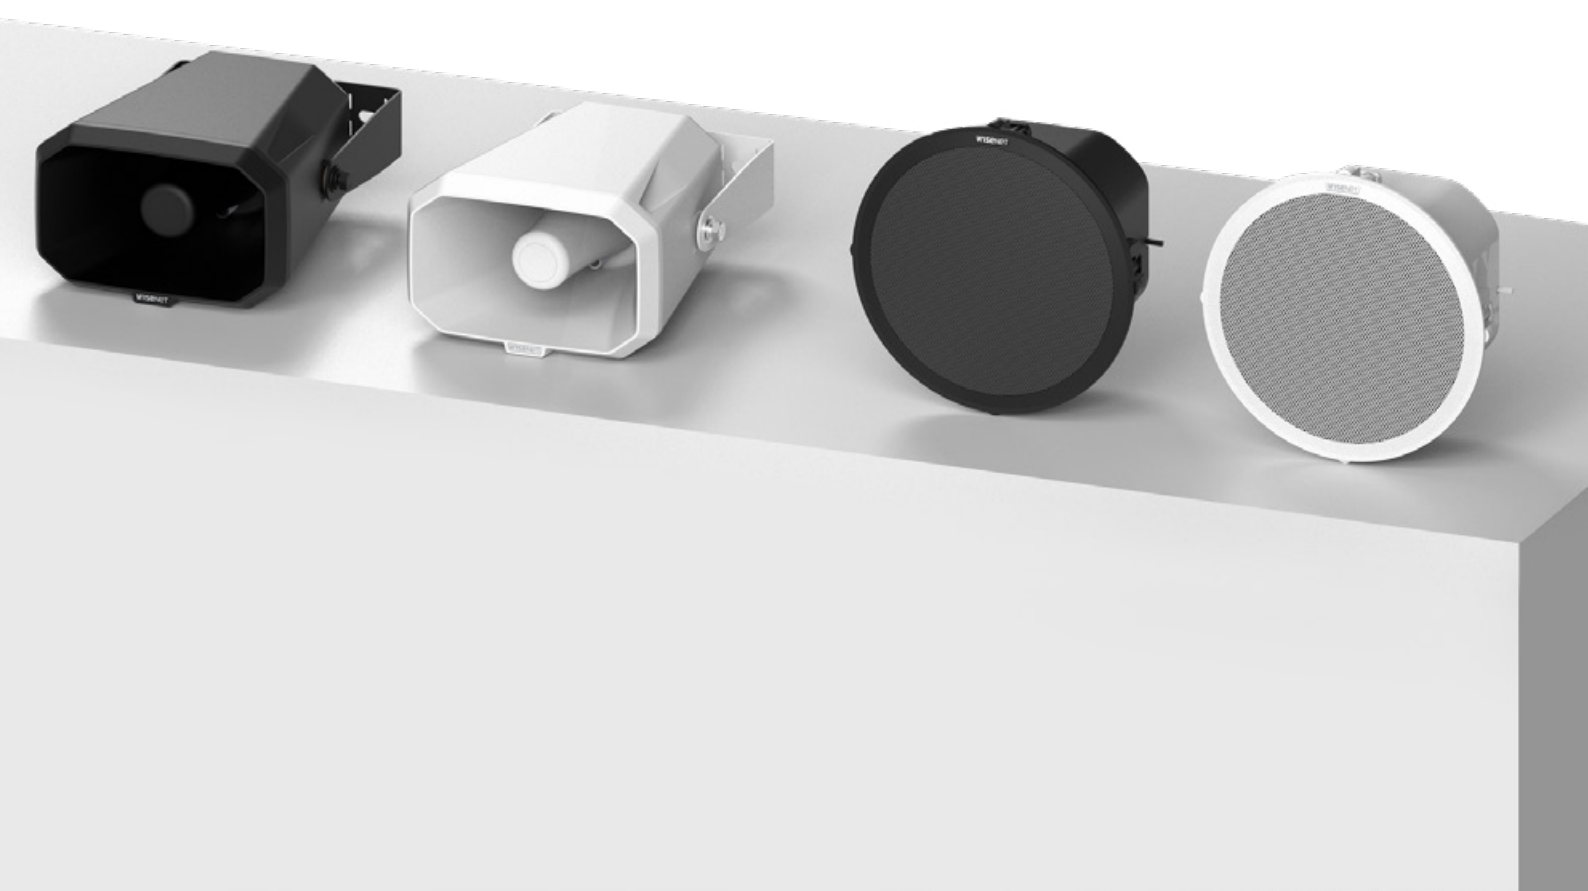

IP Audio Systems are simpler to install and integrate with video surveillance systems than analogue ones; they are easier to use and more cost-effective.

You can also proactively deal with events detected by cameras by immediately giving the right messages to audiences through IP speakers.

Adding an IP Audio System to a video surveillance system allows you to customise your security strategy for multiple environments and circumstances.

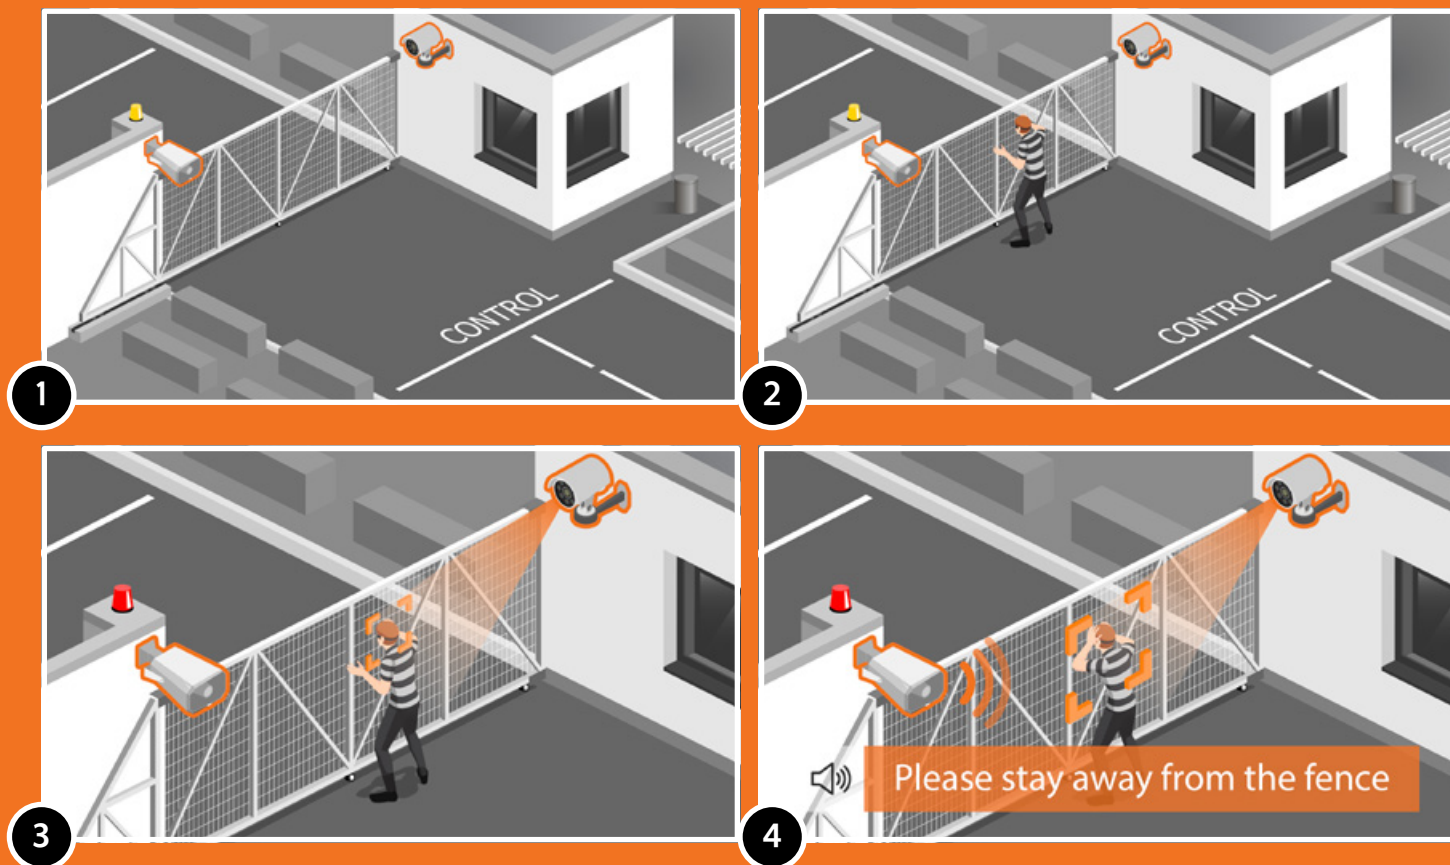

# Safeguard your property

The compelling combination of video surveillance and audio system helps you take proactive action upon detection of any intrusion attempt. The alarm message through IP audio systems effectively warns intruders and prevents any avoidable losses.

#### USE CASE EXAMPLE

### Fence / Borderline

# Offer a better and safer banking experience at ATM

*“Please respect the privacy of the person using the ATM”.*

You can maintain security by using cameras equipped with analytics, such as a social distance measurement to trigger pre-recorded announcements for customers waiting in the queue.

USE CASE EXAMPLE

## ATM

Prevent any risks  
and keep stores  
**well-managed**

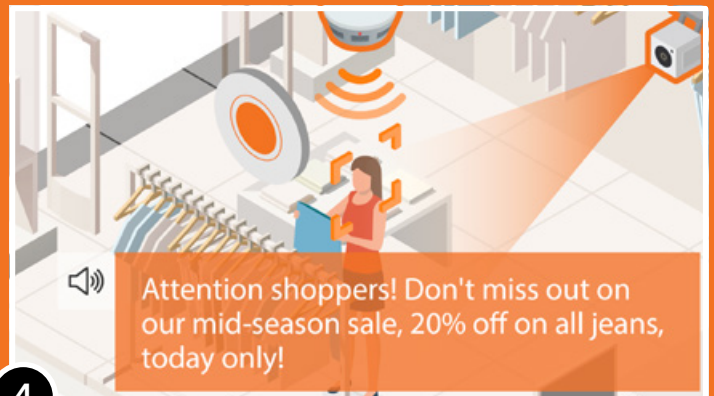

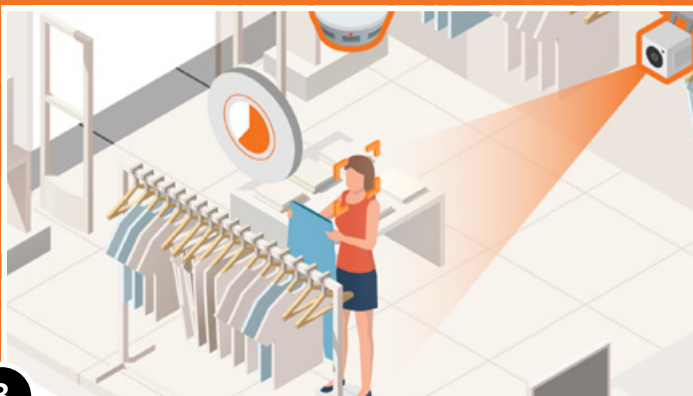

Take advantage of the dwell time analytics on board the cameras to notify customers of special offers that may be of interest to them.

USE CASE EXAMPLE

## Shop / Department Store

# Efficiently operate buildings with background music and broadcast

Add a lively mood to the customer experience. IP speakers allow rich-sounding background music to be played. In addition, it's easy to manage announcements at any time and anywhere with live or pre-recorded voices.

**Schedule 1** 07:00 ~ 24:00

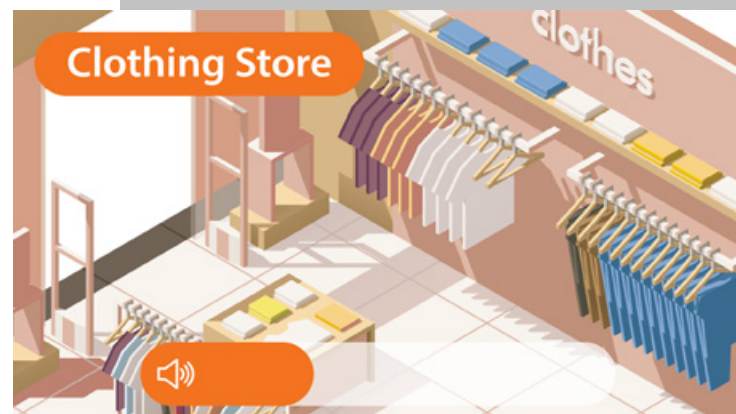

🎵 BGM with Playlist 1

**Schedule 2** 11:00 ~ 13:00

🎵 BGM in lunch time only

**Schedule 1** 09:00 ~ 19:00

🎵 BGM with Playlist 2

Restaurant

Cafe
